The table incorporated in this summary gives detailed data, by sex, on degrees conferred at each level for the year 1961-62 for each field of study. This summary will be followed by a complete report which will include analytic and historical material, institutional data by field, and a detailed statement of the survey methodology.

SUMMARY REPORT ON BACHELOR'S AND HIGHER DEGREES CONFERRED DURING THE YEAR 1961-62 1/

The survey-form for bachelor's and higher degrees was revised in 1960-61 to provide separate data on 4-year bachelor's and first-professional degrees and first-professional degrees requiring 5 or more years. The revision was made so that first-professional degrees requiring a longer period of study such as medicine, dentistry, library science, and law would have a separate level of study designation. The revised levels are included in this summary report. Figures in this report may, however, be compared to figures reported in prior publications if data for the 4-year bachelor's degrees are combined with data for first-professional degrees requiring 5 or more years.

During the 12-month period ending June 30, 1962, approximately 383,000 4-year bachelor's and first-professional degrees were conferred by institutions of higher education in the aggregate United States 2/. As compared with the preceding year, the 1961-62 total represents an increase of 4.8 percent.

The number of first-professional degrees conferred during 1961-62 requiring 5 or more years' work was approximately 38,000--an increase from the previous year of 3.3 percent. Approximately 85,000 second-level (master's except first-professional) degrees and slightly more than 11,600 doctors (Ph.D., Ed.D., etc.) degrees were conferred during 1961-62--increases of 8.5 percent and 9.9 percent respectively, from the preceding year.

The percent of degrees conferred on men and women at each level was as follows: 4-year bachelor's and first-professional, 59.7 percent men, 40.3 percent women; 5 or more years first-professional, 89.1 percent men, 10.9 percent women; second-level, 69.2 percent men, 30.8 percent women; doctorates, 89.3 percent men, 10.7 percent women.

The table incorporated in this summary gives detailed data, by sex, on degrees conferred at each level for the year 1961-62 for each field of study. This summary will be followed by a complete report, which will include analytic and historical material as well as institutional data by field, and will give a detailed statement of the survey methology.

1/ By Wayne E. Tolliver, Education Research and Program Specialist, Higher Education Surveys Section, Studies and Surveys Branch.

2/ The aggregate United States include the 50 States, the District of Columbia, and outlying parts (Canal Zone, Guam, and Puerto Rico).

* Bachelor's and first-professional degrees were not divided into these categories prior to 1960-61.

It is significant to note that 100 percent of the 4-year degree-granting institutions of higher education responded to the request for data in the survey of "Bachelor's and Higher Degrees Conferred Between July 1, 1961, and June 30, 1962."

Major Field Not Identified	56	49	7	- -	- -	- -	12	12	- -	- -	- -	- -

[1]The term "Aggregate United States" refers to the 50 States, the District of Columbia, and outlying parts (Canal Zone, Guam, and Puerto Rico).

[2]Does not include Psychology, which, because of its multicategory nature, has been listed independently.

[3]Includes degrees based on secondary education as the major field of study. Registrars were directed to classify degrees based on a teaching major in the particular subject-field, such as English, biology, physical sciences, business, as degrees in the field itself rather than as degrees in Secondary Education.

[4]For a breakdown of engineering degrees by field of specialization, see circular entitled "Advance Report on Engineering Degrees (1961-62) and Enrollments (Fall 1962)."

[5]Does not include Geography, which, because of its multicategory nature, has been listed independently.

[6]Does not include Geography, Philosophy, or Psychology, which, because of their multicategory or comprehensive nature, have been listed independently.
